PS C:\Users\ROBALDO BADIO\Desktop\Monprojet> git checkout bac6190d707b0346fb0406eaf8577d033b2e477a
Note: switching to 'bac6190d707b0346fb0406eaf8577d033b2e477a'.

You are in 'detached HEAD' state. You can look around, make experimental
changes and commit them, and you can discard any commits you make in this
state without impacting any branches by switching back to a branch.

If you want to create a new branch to retain commits you create, you may
do so (now or later) by using -c with the switch command. Example:

    git switch -c <new-branch-name>

Or undo this operation with:

    git switch -

Turn off this advice by setting config variable advice.detachedHead to false
HEAD is now at bac6190 Ajout Module
PS C:\Users\ROBALDO BADIO\Desktop\Monprojet> git checkout 9d95d9db48423832fdc22ff7a1dd461f9275190d
Previous HEAD position was bac6190 Ajout Module
HEAD is now at 9d95d9d Ajout fichier et fichier1

The screenshot shows the GitHub interface for a repository named 'Labo1' owned by 'AGENARenaud'. The repository is public and has 1 branch (main) and 1 tag. The README file is visible, showing the title 'Labo1'. A 'Code' button is highlighted, and its dropdown menu is open, showing options for cloning the repository: Local, Codespaces, HTTPS, SSH, and GitHub CLI. The SSH option is selected, and the URL 'git@github.com:AGENARenaud/Labo1.git' is displayed. A 'Copy url to clipboard' button is also visible. The right sidebar shows the 'About' section with no description, website, or topics provided, and the 'Releases' and 'Packages' sections with no releases or packages published.

En conclusion, ce travail me permet de mieux comprendre quelques fonctionnalités sur Git et GitHub et je peux dire avec un bon enseignant, on peut tout comprendre et accomplir dans quelques heures de cours.
